

SLP for Houston, TX ECI and Outpatient

SLP's are needed for this large facility with a nineteen acre campus and 30,000 sq. ft. of modern and efficient treatment space, including an Indoor Junior-Olympic heated pool and spa for exercise and treatment.

Early Childhood Intervention cuts off at age 3. Once a child enters the program they tend to stay until they age out, so there is considerable variety of medical diagnoses, such as Downs Syndrome, chromosomal abnormalities. Mostly general developmental delays which may be undiagnosed because they are so young or a result of prematurity. Also, children with atypical oral motor and feeding problems, and atypical behavior such as those on the PDD spectrum.

Length of stay is dependent on the needs of the child and at what age they were referred. Children with lifelong disabilities will stay until age three. Other children with mild delays are discharged once they are evaluated and shown to be demonstrating skills at age level.

Our outpatient clinic for pediatric (age three and up) and adult is all clinic based. Length of stay is 6-8 months, typically 1-2 times weekly.

Our current staff in ECI consists of 3 SLPs and 3 Assistants. We will be adding with this new position.

Starting salary for a CFY would be somewhere in the range of mid-upper 50's--or higher. Salary is higher for an experienced SLP-CCC.

Sign-on is negotiable.

Relocation assistance between \$2,000 and \$4,000.
